

Alaska Federation of Natives and National Congress of American Indians. Finally, a substantial number of my constituents, Native Hawaiians and non-Native Hawaiians support this bill.

In 1993, P.L. 103-150, the Apology Resolution, was enacted into law. The Act provides an apology to Native Hawaiians for the participation of U.S. agents in the overthrow of the Kingdom of Hawaii in 1893 and sets up a process of reconciliation between Native Hawaiians and the United States. My colleague from Arizona has submitted multiple articles criticizing the Apology Resolution and purporting to justify one of the most painful experiences in Hawaii's history, the overthrow of the Kingdom of Hawaii in 1893.

I have worked on this bill for the past 6 years with the rest of my colleagues in Hawaii's Congressional delegation. This bill is a step in the right direction for all people of Hawaii because it provides a structured process that will allow us to finally resolve many of the longstanding issues resulting from the overthrow. It is disturbing that opponents to the bill rely so heavily on mischaracterizations of the legislation to advocate their position.

I stand by Hawaii's history as enacted in P.L. 103-150. The facts as cited are well-documented by historians. It greatly saddens me that the opponents to my bill feel the need to rewrite Hawaii's history, as painful as it is for those of us who have lived it, in order to advocate their position on S. 147. It is one thing to oppose my bill. It is quite another, however, to trivialize the history of Hawaii.

THIRTY-THIRD ANNIVERSARY OF TITLE IX

Ms. CANTWELL. Mr. President, I rise today to mark the 33rd anniversary of the enactment of title IX, a law that has opened doors to educational opportunities for countless women and girls across America.

Prior to passing title IX, roughly 295,000 girls participated in high school sports, and only about 25,000 played sports at the college level. When President Nixon signed the educational amendments of 1972 into law 33 years ago, skeptics claimed the law would do little to change women's participation in sports.

They could not have been more wrong. Recent data show that nearly 2.6 million high school girls and over 135,000 women in college participate in organized sports, constituting more than 40 percent of all high school athletes.

In Washington State, women at public colleges and universities represented less than one-third of most schools' athletes less than 15 years ago. Today, women represent 48 percent of athletes at public institutions of higher education in our State. As the numbers of girls participating in sports has increased, there has been a decrease in

the number of girls who drop out of school, smoke, drink alcohol or have unwanted pregnancies. What's more, adolescent girls that participate in organized sports enjoy improved physical and mental health throughout their lives.

Today, 1 in every 2.5 girls participates in athletics, which is an 800-percent increase in participation rates since the enactment of title IX. Yet attempts to weaken title IX persist. Last March, the Department of Education issued a policy guidance that would weaken Title IX. The new clarification would allow institutions to avoid offering sports opportunities to women if a sufficient number of the student body failed to respond to an e-mail survey expressing interest in the program. This allows universities to use what may be highly questionable, potentially inaccurate e-mail survey results to prove that the interests and abilities of the underrepresented sex have been accommodated, as title IX requires.

I am deeply concerned that this policy guidance represents the current administration's repeated attempts to diminish the enforcement of this very important law and believe that e-mail surveys will likely underestimate the need to expand athletic opportunities for women. The growth of opportunity for women and girls should not hang on the outcome of such informal means of data collection.

Our Nation has taken great strides toward equity, and title IX has played a significant role in that success. Millions of girls have access to opportunities that their mothers never knew. However, there is still much to be done before we can say that males and females are treated equitably in education. Further progress hinges on our continued commitment to the principles of title IX and proper enforcement of the law.

GENERAL BERNARD ADOLPH SCHRIEVER

Mr. SALAZAR. Mr. President, it is with deep sorrow that I come to speak on the floor of the Senate today. The father of the United States Air Force space and missile program, General Bernard Adolph Schriever, died today of natural causes. He is survived by his wife, his three children, and his two step-children. I offer them my deepest condolences and prayers as they go through this difficult time.

General Schriever was a great American. Born in Bremen, Germany in 1910, Schriever's family moved to America 7 years later, where he became a naturalized citizen in 1923. Schriever would give 33 years of distinguished military service to his new home.

During his exceptional career in the Air Force, General Schriever led America's charge into space. When President Dwight Eisenhower assigned the Nation's highest priority to the development of an Inter-Continental Ballistic Missile, the Air Force assigned

Schriever to manage the program. He demanded sweeping authority to accomplish the job, authority that Schriever's commander gladly granted him.

The success of the ballistic missile and space programs managed by Schriever was phenomenal. The progression of the Thor Intermediate Range Ballistic Missile, from program approval to the Initial Operational Capability, took only 3½ years. The Atlas's development time was little more than 5 years, and the Titan's less than 6. Moreover, even as the first Titan lifted off from Cape Canaveral, Schriever's group was already developing the more advanced Titan II.

The Minuteman, from start to finish, took only 4 years and 8 months to deploy. The first ten were on combat alert in their underground silos in October of 1962. Schriever's organization could rightfully take credit for winning the Cold War's race for missile supremacy, helping to ensure America's safety and security in perilous times.

Schriever had assembled an organization with the highest educational level of any U.S. military organization either before or since that time. More than a third of his hand-picked officers had Ph.D.s and Master's degrees. Schriever believed that America had to develop its mind power if the country was to survive in the space age, a belief we would be well served to listen to today.

General Schriever's legacy lives on in the men and women of Schriever Air Force Base in Colorado Springs. The more than 3,400 military and civilian employees continue to provide our Nation with an aerospace capability second to none. The base flies nearly all of the Department of Defense's satellites.

Colorado is proud of the men and women who serve at Schriever Air Force Base, and we are proud of the legacy left to us by General Bernard Adolph Schriever.

ADDITIONAL STATEMENTS

CHAMBER OF COMMERCE MILESTONES

• Mr. ALLEN. I am pleased today to recognize the Prince William County-Greater Manassas Chamber of Commerce which celebrates its 70th anniversary this year. For seven decades, the Chamber has supported the community, educational and business interests of Prince William County and the cities of Manassas and Manassas Park.

In 1935, a small group of citizens gathered together in the Town of Manassas with an idea to form the Chamber of Commerce. These leaders founded an organization that has prevailed through times of prosperity and depression, and that continues to grow and prosper. Today, the Chamber has almost 1000 members, and it holds an accreditation from the United States Chamber of Commerce. Only 15 percent
